### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: applicant's arguments filed 10/10/2007 are persuasive and binding. Furthermore, it is noted that the cooling holes of Jorgensen et al are effusion cooling holes which are known to produce a cooling film on the transition wall which are distinct from the dilution holes of the claims. Dilution holes require sufficient penetration into the combustion exhaust gases to cool the bulk flow rather than just cool the wall.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
